

Workflow analysis report

Prepared by Flow Migrator to support Nintex to Power Automate migration planning.

Workflow: Evaluation Checkpoint

Source file: evaluation-checkpoint-source.zip

Generated: 10/20/2026, 3:05:55 PM

Supported 4	Partial 0	Unsupported 0	Total steps 4
-----------------------	---------------------	-------------------------	-------------------------

Summary

Trigger: Manual start

Steps: 4 total (3 detected source steps + trigger)

Coverage: 4 supported, 0 partial, 0 unsupported

Connectors: Data Operations, Workflow

SharePoint targets: -

Description: Synthetic demonstration: a manual start and three Log-to-Compose actions. Local artifact checks only. Live Power Platform import and execution have not been performed. No customer workflow data.

Risk flags

- No immediate blockers detected from this analysis.

Needs review

- No partial, unsupported, or unknown steps detected. Destination validation is still required.

Recommended next steps

1. Review every Partial, Unsupported, and Unknown step before export.
2. Confirm required Power Automate connections and connection references.
3. Validate the generated flow in Power Automate after import.

Step mapping

Seq | Status | Nintex step -> Power Automate action | Connector

001 | supported | Manual start -> Manually trigger a flow | Workflow

Notes: Synthetic manual trigger. Destination import and execution remain to be tested.

002 | supported | Log 1 -> Compose | Data Operations

Notes: Preserved message: Begin evaluation example. Validate this Compose output after import.

003 | supported | Log 2 -> Compose | Data Operations

Notes: Preserved message: Review the generated draft. Validate this Compose output after import.

004 | supported | Log 3 -> Compose | Data Operations

Notes: Preserved message: Record your destination test results. Validate this Compose output after import.
